

LIVIN´ steuler | design for life

Rich in contrasts yet harmonious, in earthy or fresh colors, with dynamic lines or subtle, stylized blossoms: the name reflects the aim of LIVIN´, the new tile series from steuler | design. LIVIN´ is design for life! And LIVIN´ is also lifestyle that can express itself through linear clarity or floral emotionality. This new combinable tile can be used to create rooms with very different concepts and characters, whether with a masculine touch or a feminine note.

The spectrum of colors in the LIVIN´ series relies on subdued, natural hues (e.g. white, almond, melon, toffee and slate) which make countless solutions possible for smaller, larger, darker and lighter rooms. Toffee-plum and toffee-melon linear cut decors create special accents. The floral decor in the shape of a stylized lotus blossom conjures emotional moments and relaxing spa feelings.

For life ... the LIVIN´ series is completed by the new, generously proportioned, 40 by 70 cm LIVIN´ floor tile made of body colored stoneware. This series is ideal for adding style to rooms for dwelling and living. It's subtle and extraordinarily adaptable for stylish interiors and personal feelings for life.
