### **The flair of delicate graphics**

Set yourself free. Don't focus on the big picture, focus on the small things. Look at the details. Set your sights on even finer things and deliberately experience optical refinement.

THALIS interprets graphical ornaments elegantly and simply. Strict design lines are replaced by variable geometries. The result is fine structures which defy all constructional logic.

Fashionable and refined at the same time: Wall tiles in white, cardinal red, linen and berry have the colour intensity and shading to form an excellent basis for detail-oriented design. As well as the filigree lines, the interaction between silk-matt finishes and softly shimmering effects set the scene in the bathroom and create unusual highlights in living rooms or bedrooms. The new and stylish tile format 25 x 70 cm with cut-line decoration comes in cardinal red with black inserts and a cosmopolitan look. Borders in the same colour tones as the plain tiles enrich the representative range by providing additional combination options. Floor tiles in matching shades of black, cardinal red and berry provide a tasteful finishing touch to the well thought-out atmosphere.

THALIS has an individual feel for aesthetics – subdued elegance, contemporary flair and subtle oriental expressions.
